OnMed will continue to be driven by its Mission: Quality affordable healthcare for everyone everywhere. The use of and reliance on Virtual Care models will continue to grow exponentially as a way to provide more access, lower costs and provide a more convenient and positive patient experience. OnMed will continue to be a leader in the growth and transformation of Virtual Care and the related patient experience.

We are driven to continually blend the newest and most effective diagnostic and medical technology with an expansive Care Management and Clinical breadth. While we will continue to be a leader in Primary Care, we will look to expand the ability of the OnMed Remote Care Stations to address a broader spectrum of medical, physical, mental health solutions and health equity across the market.

We will increasingly integrate new sources of patient data and advance the overall patient relationship across the entire OnMed Care and Engagement Platform.
